

Desk Reference: OMB *Information Quality Bulletin for Peer Review*

Scope

The OMB *Information Quality Bulletin for Peer Review* (OMB *Bulletin*) covers the NIH and other Federal agencies that are subject to the Paperwork Reduction Act. This Desk Reference was developed for the NIH and for HHS programs located organizationally within the NIH (e.g., the National Toxicology Program).

Applicability

To be covered by the OMB *Bulletin*, a document, report, presentation, or other information product must meet all four of the following criteria:

- Be disseminated by the NIH or a component of an NIH IC or OD Office
- Represent the official views of the NIH or an NIH IC or OD Office
- Contain scientific information
- Be "influential"

Effective Date

June 16, 2005

Contacts

NIH IC and OD Office Implementation

- Beginning on June 16, 2005, use disclaimers on "influential scientific information" (ISI) that is disseminated by NIH scientists unless the information represents the official views of the NIH. Also, use disclaimers on draft ISI when the information is shared for (1) the OMB *Bulletin* or peer review or (2) scientific input prior to peer review. (<http://ospp.od.nih.gov/infoquality/intranet/disclaimers.asp>)
- Approximately 6 months or as soon as possible before the desired date of dissemination, notify your NIH IC or OD Office Point-of-Contact (<http://ospp.od.nih.gov/infoquality/intranet/iccontacts.asp>) of any scientific document, report, or other information product so that the Point-of-Contact can recommend whether the information is "influential." NOTE: NIH IC and OD Office Points-of-Contact need not be notified of publications and meeting abstracts cleared through the official clearance process at www.od.nih.gov/oir/sourcebook/oversight/pub-clear.htm.
- In coordination with the NIH OSPP, conduct peer reviews of all ISI and highly influential scientific assessments *prior to* dissemination.
